INTRODUCTION

This report presents 1957 and 1958 traffic accident data on the rural sections of Montana's Primary Highway system. It is based on all accidents occurring on this system that were reported to the Highway Patrol during the two year period.

Details of all accidents resulting in twenty five dollars or more property damage, an injury or a death, must be submitted to the Montana Highway Patrol on standard report forms as required by State law. Data from each accident report were transferred to International Business Machine cards to facilitate summarization. Business Machine methods were also used to compute the accident rate and print the duplimats from which this report was reproduced.

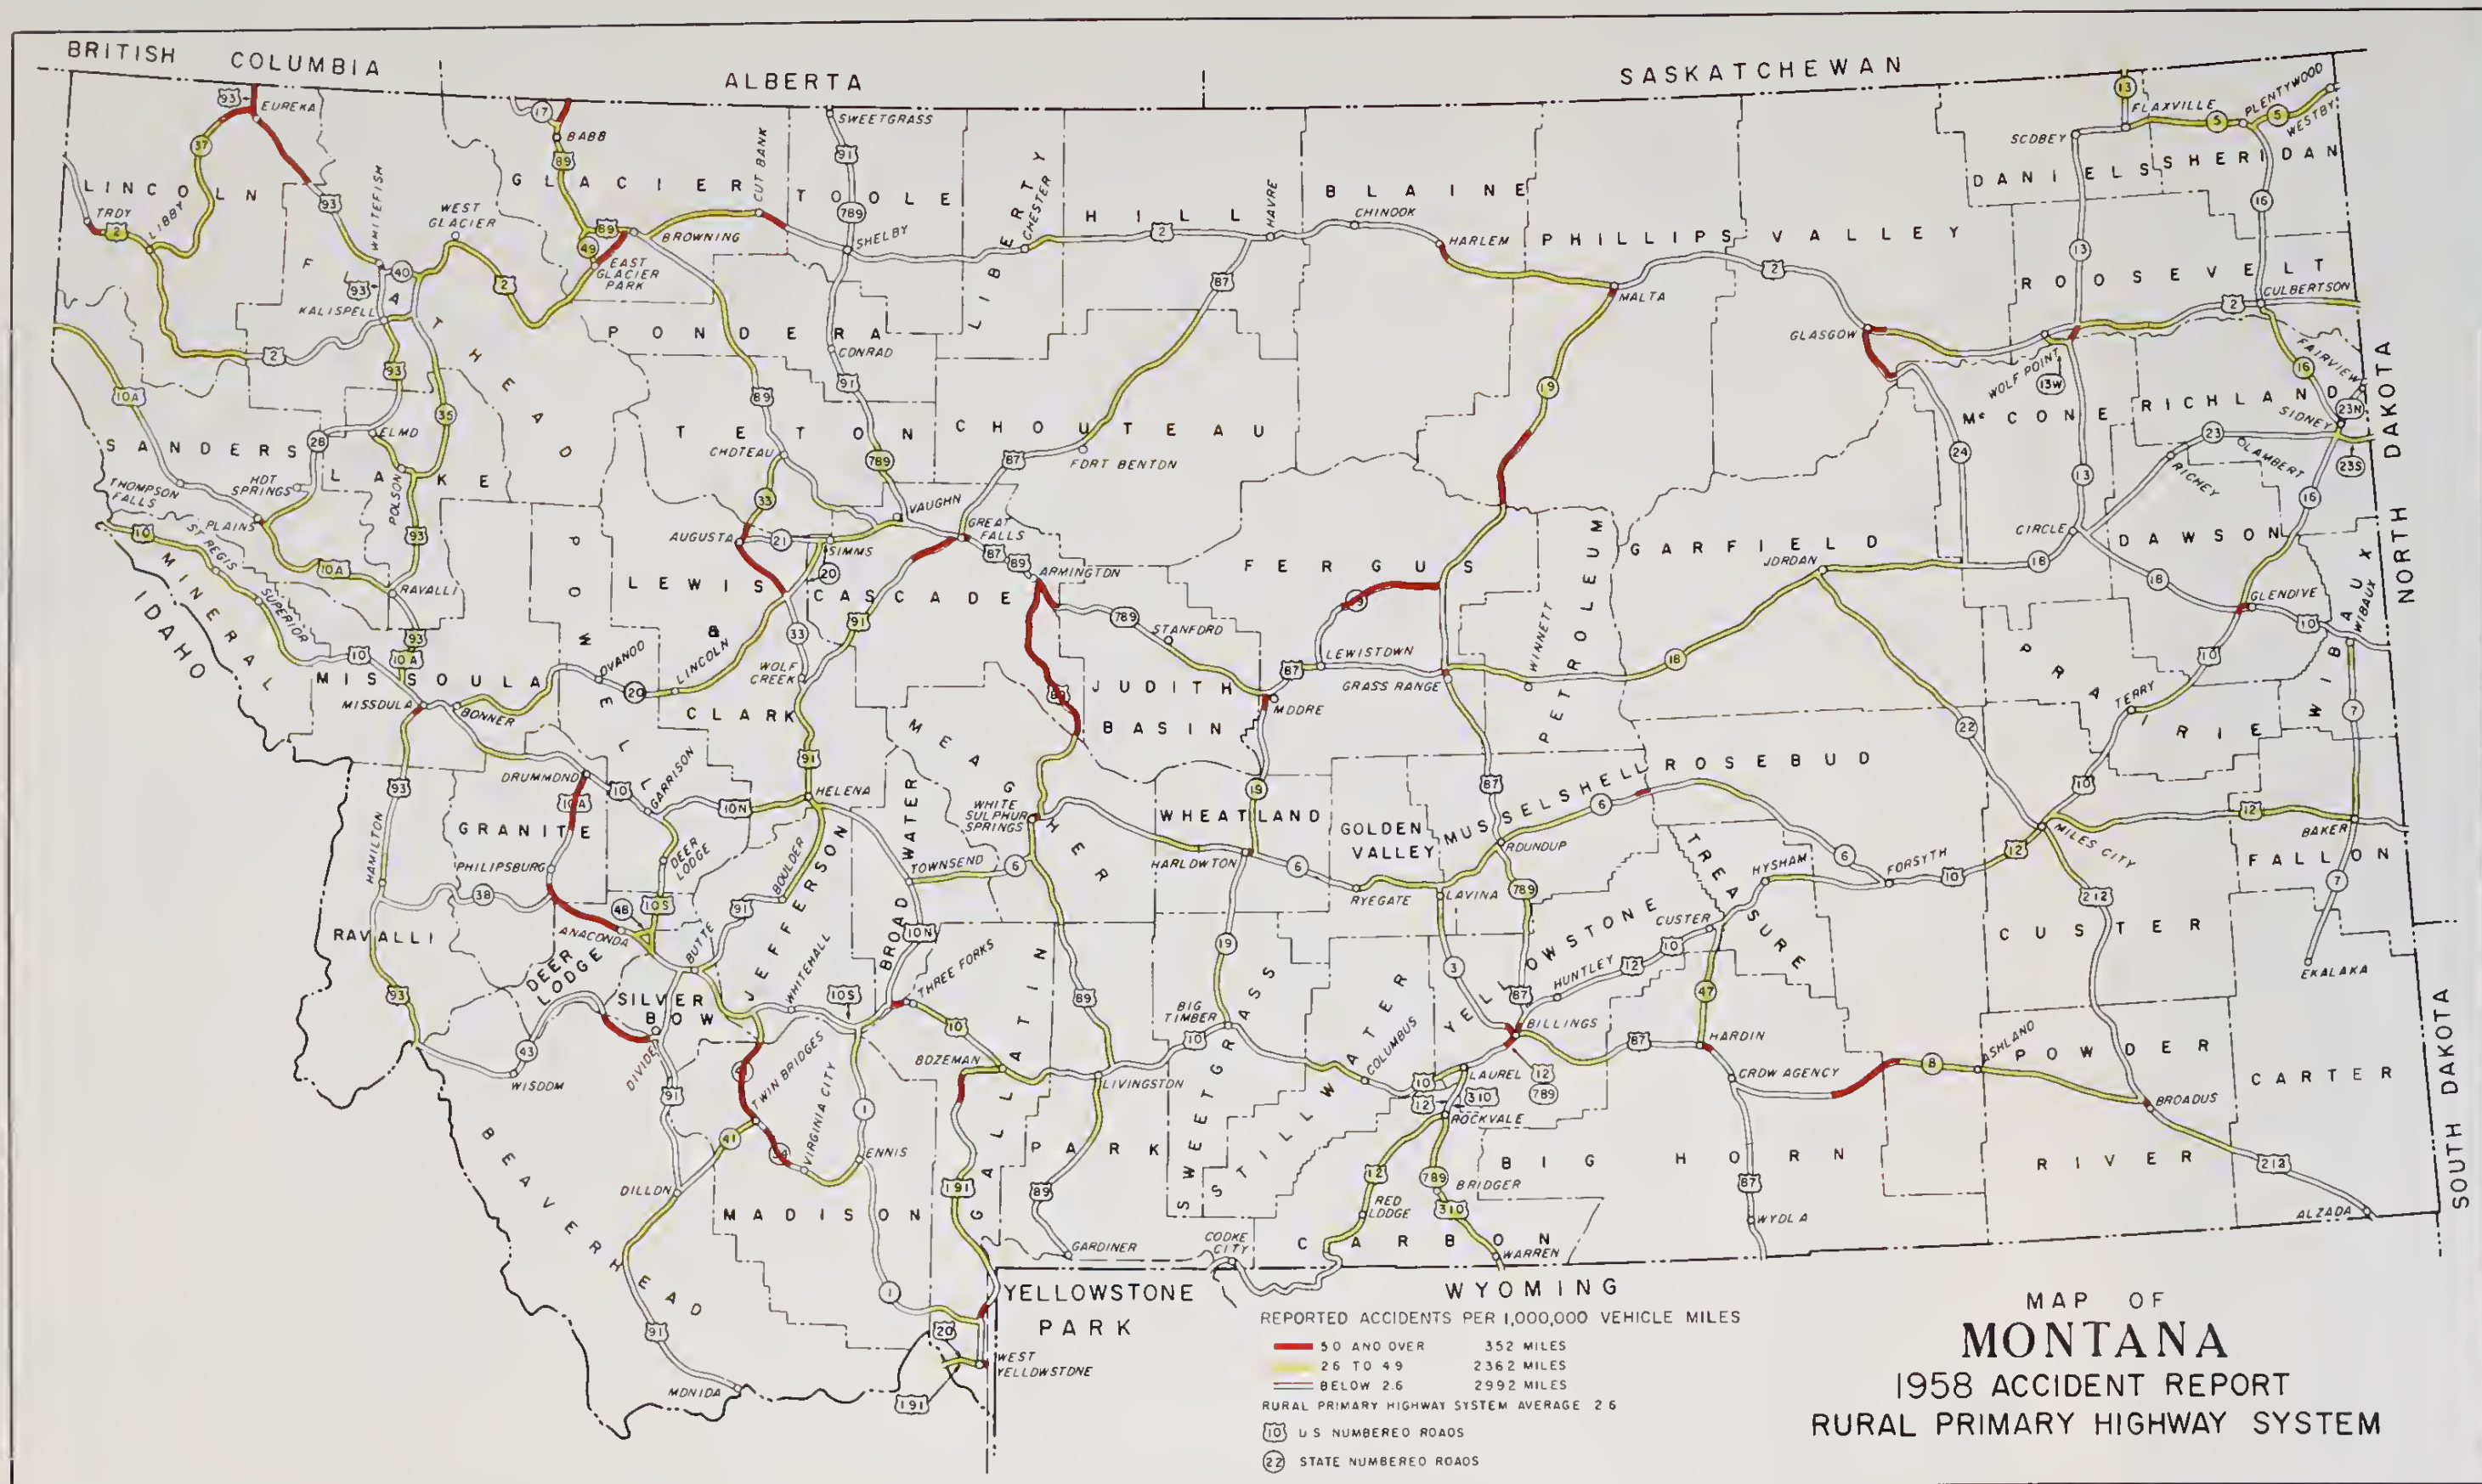

The first section of the report lists pertinent accident data by Highway Patrol section on each Federal Aid route. The second section of the report lists each Highway Patrol section in descending order by accident rate per 1,000,000 vehicle miles. Accidents on each Federal Aid Route are summarized in the back of the report .

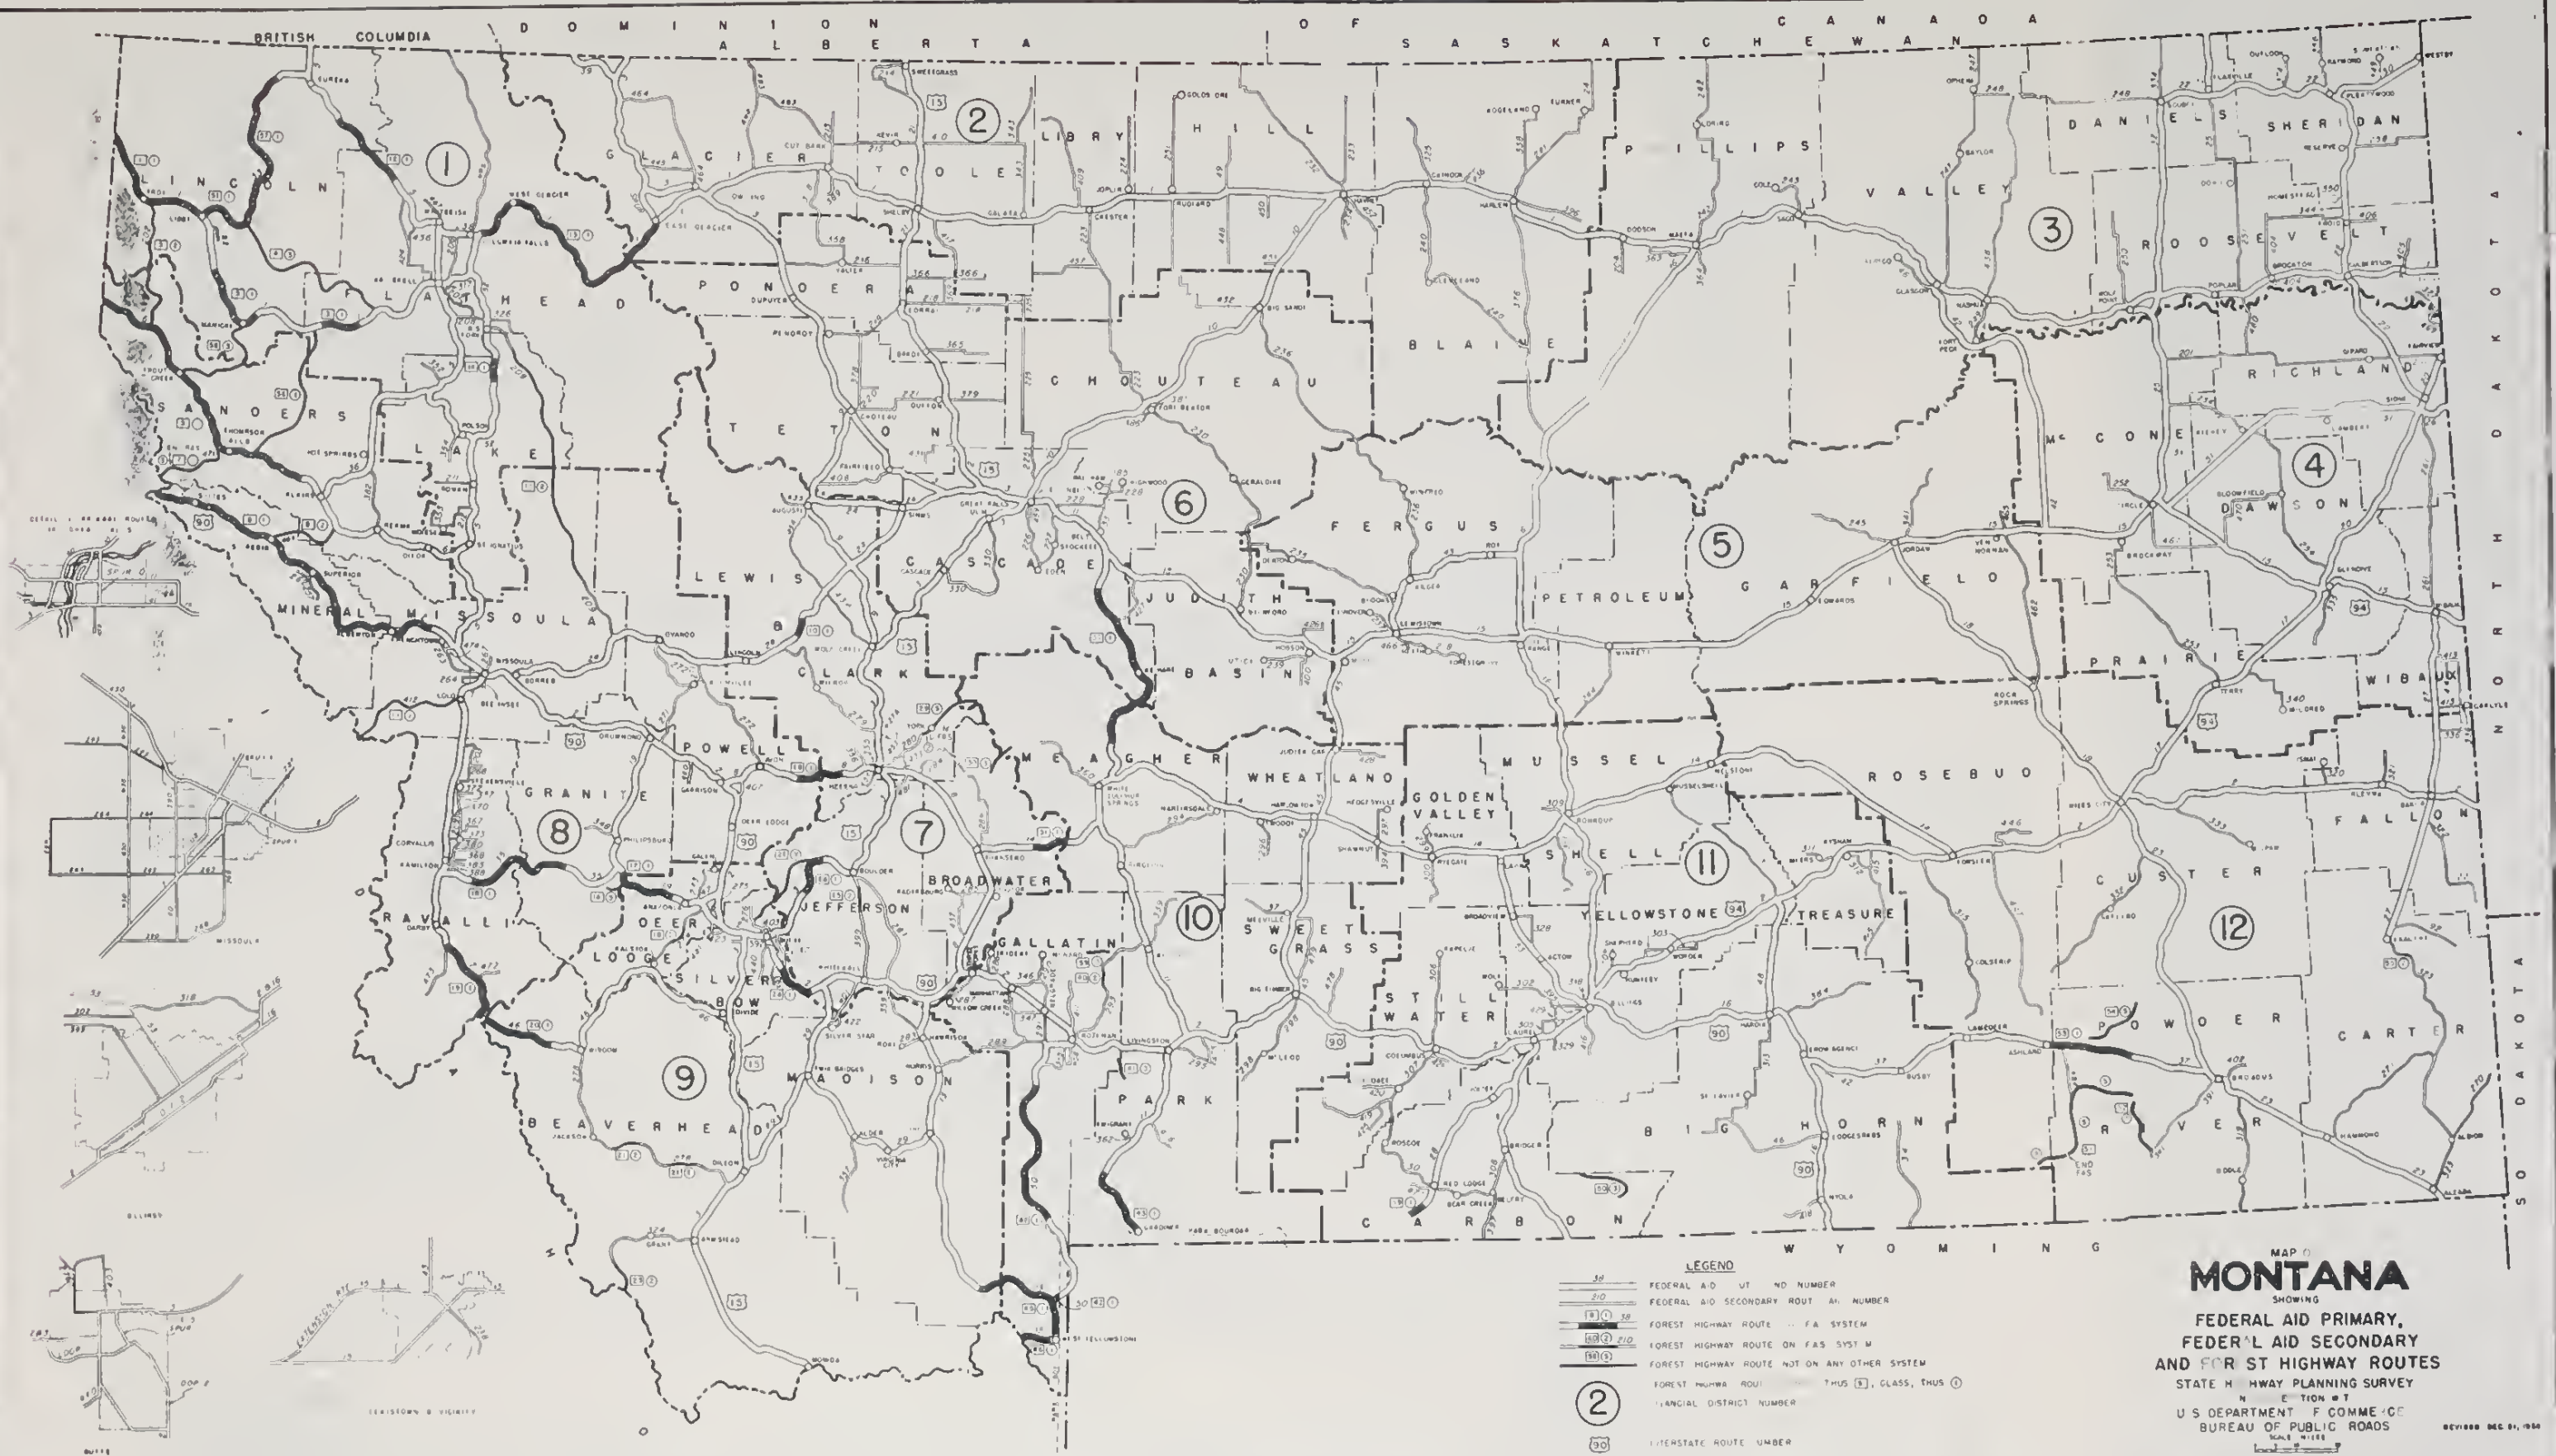

The following tabulation is a State wide summary of each item listed in the report.

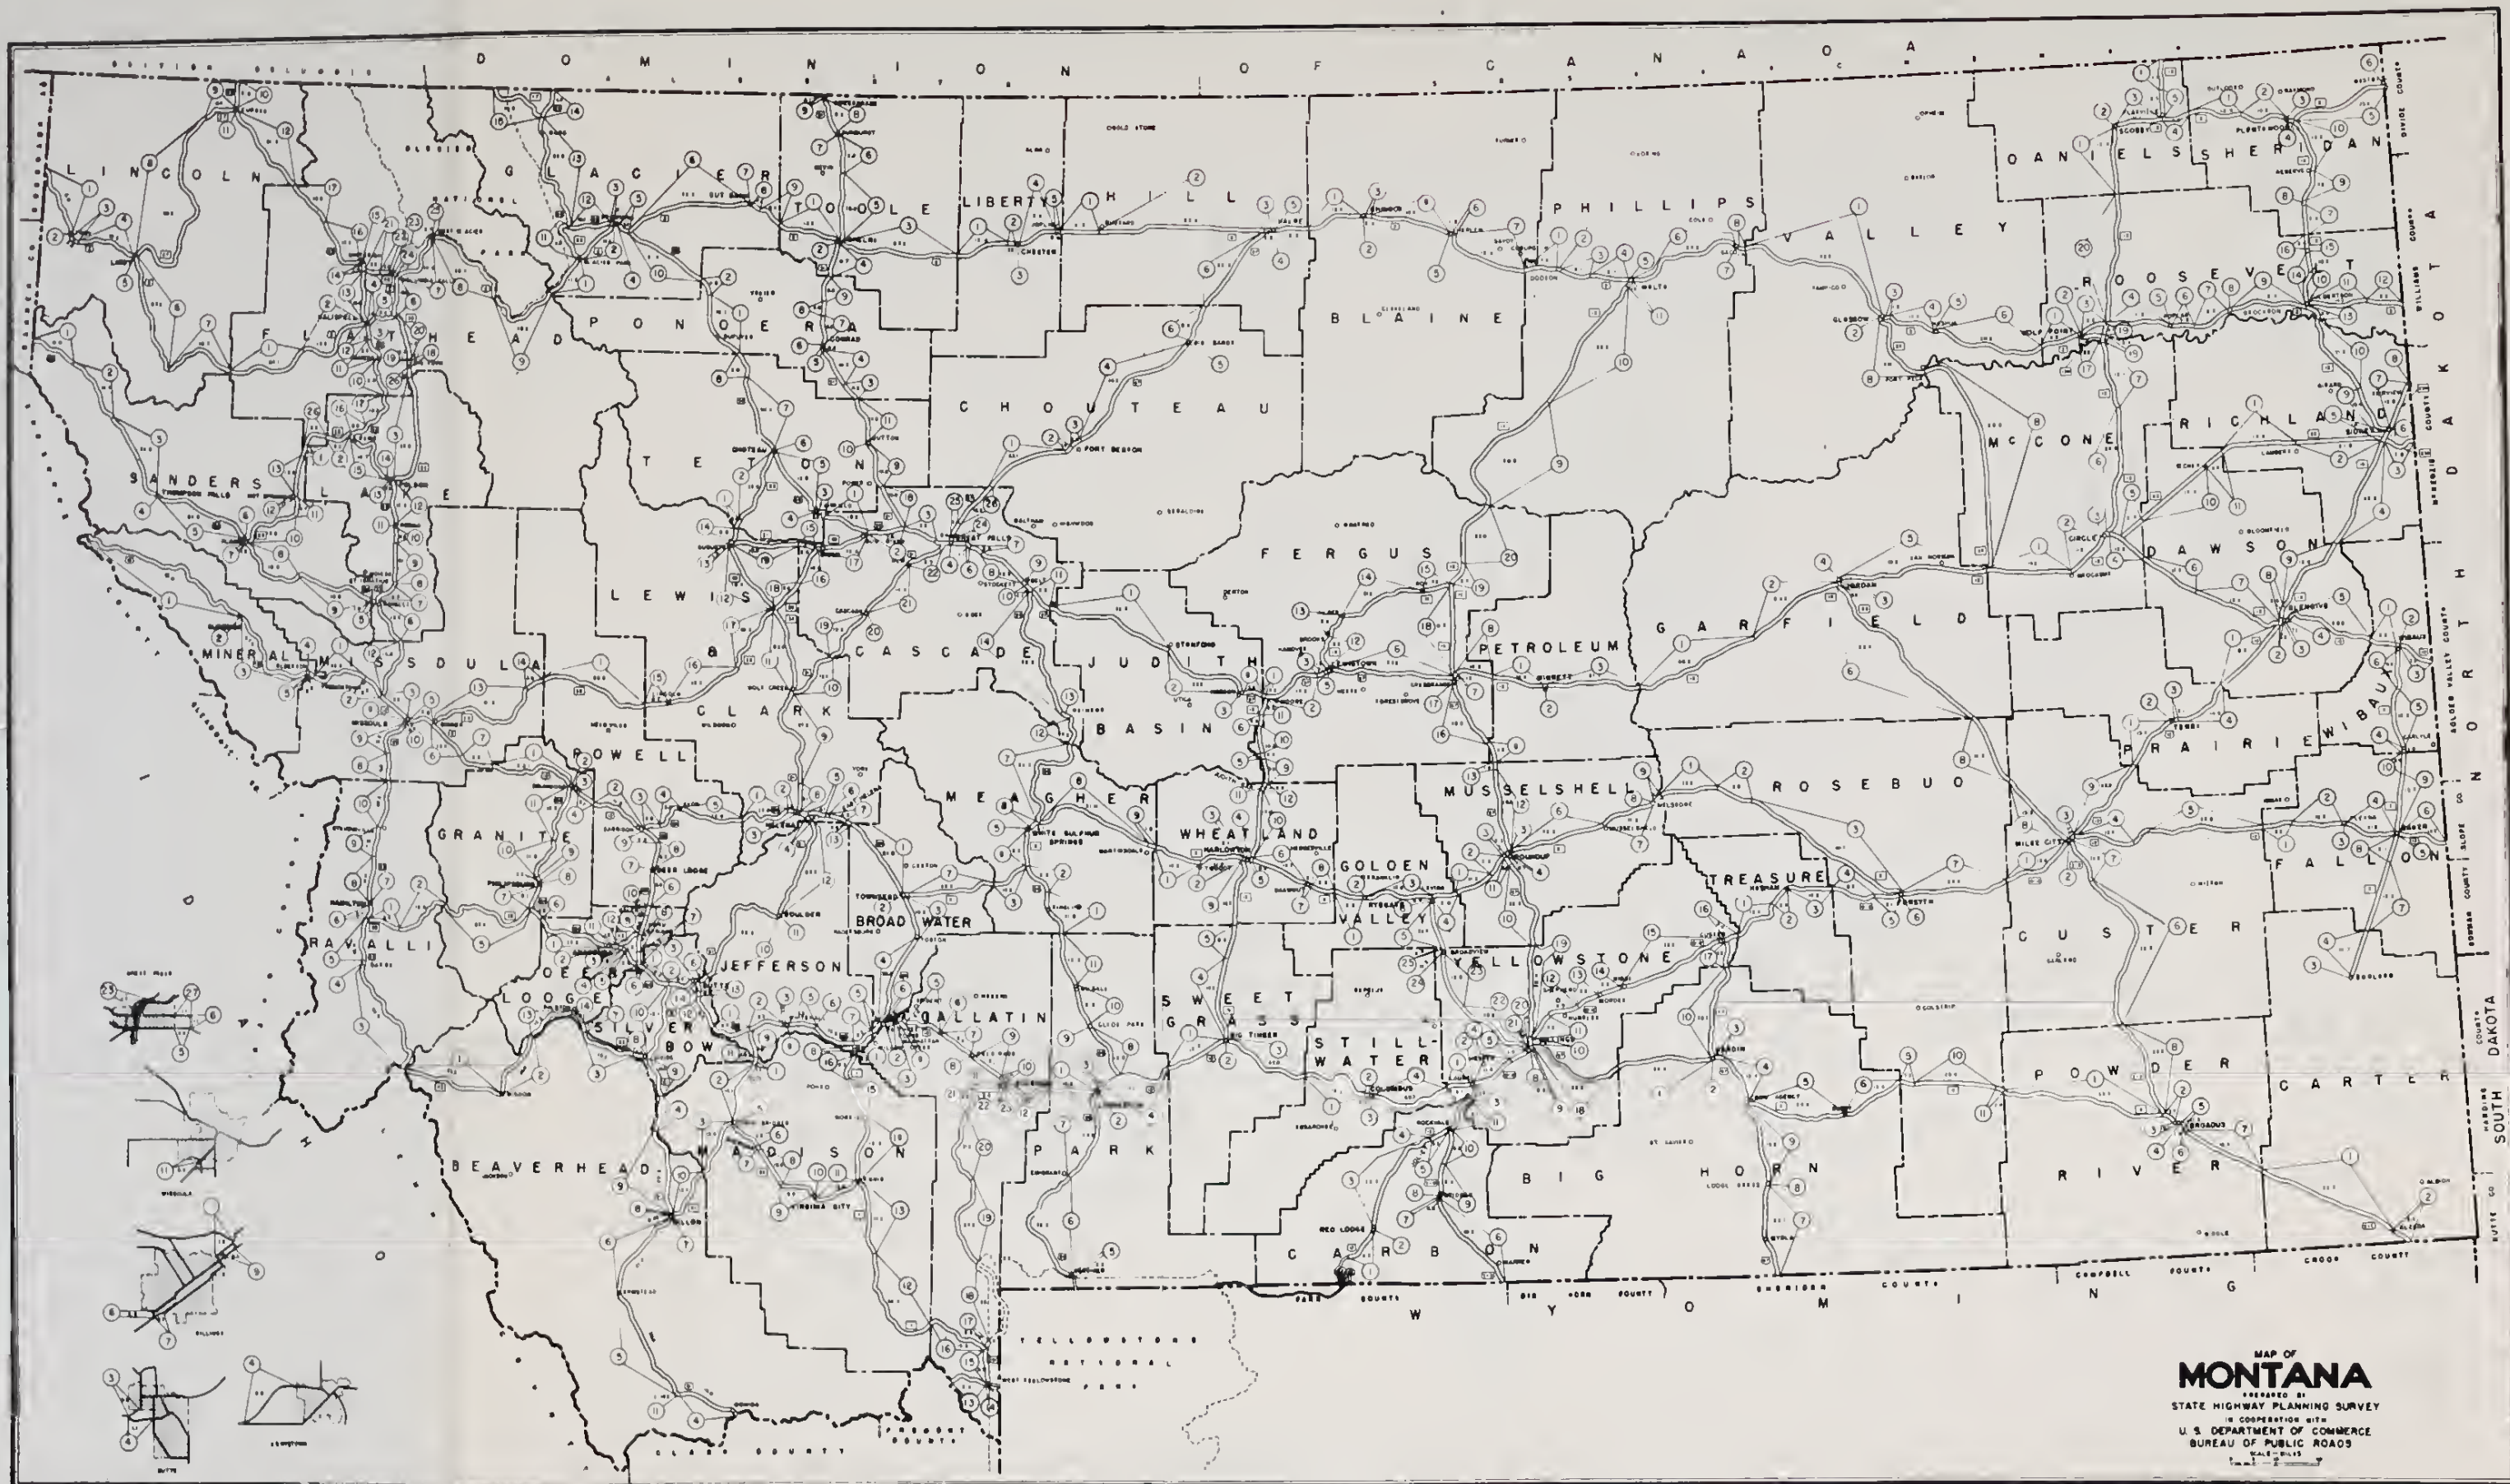

ITEM	STATE WIDE GRAND TOTAL	
	<u>1957</u>	<u>1958</u>
Section length in miles & tenths (Rural constructed mileage - Primary System)	5644.7	5706.1
Average Daily Traffic Volume	788	782
Number of Property Damage Accidents	2969	3009
Number of Injury Accidents	1070	1145
Number of Fatal Accidents	118	115
Total Number of Accidents	4157	4269

	<u>1957</u>	<u>1958</u>
Number of persons injured	1716	1816
Number of persons killed	143	129
Amount of property damage as reported to Highway Patrol	\$2,772,890	\$2,837,683
Total economic loss based on the National Safety Council's estimate of \$1,000 for each personal injury and \$22,000 for each fatality added to the reported property damage.	\$7,634,890	\$7,491,683
Accident rate - expressed as the total number of accidents of all types per million vehicle miles of travel.	2.6	2.6

The State map on the following page shows the location of all sections of highway having an accident rate above the State average of 2.6. About 352 miles of highway shown in red have an accident rate of from 5.0 to 45.5 and are considered critical. Sections shown in yellow, totaling 2362 miles, have an accident rate of from 2.6 to 4.9. Sections below the State average of 2.6 accidents per million vehicle miles of travel total 2992 miles and are shown on the map by means of an open band.
